

Exploring the main mobility research gaps in Europe

The workshop objective is to present the results and insights obtained so far in CAMERA, analyse and assess our definition of Key Performance Areas (KPAs) and explore gaps in mobility research in Europe by incorporating experts' observations into the loop.

Transport stakeholders and experts, European Commission representatives, members of relevant European Technology Platforms (ETPs) and Joint Technology Initiatives (JTIs) are invited to attend this workshop and participate in this validation exercise.

The discussion will be driven to enrich and complement the data-driven methodology for mobility assessment (topic modelling on FP7 and H2020 research projects) with an experts-based approach.

AGENDA

14:00 The European mobility strategy: goals and challenges
Ulrike Schmalz, Bauhaus Luftfahrt

14:10 How AI can support knowledge discovery: understanding mobility research trends in Europe
Damir Valput, Innaxis

14:20 The importance of data visualization
Pablo Hernández, Innaxis

14:30 Why AI still needs humans in the loop
Micol Biscotto, DeepBlue

14:40 Interactive session: Finding the gaps in mobility research! (Breakout groups)

15:40 BREAK: Recharge before the wrap-up

15:50 Takeaways and wrap-up
Paula López-Catalá, Innaxis

16:00 End of Workshop

17 JUNE 2021
